# CPSC 411 - Assignment 03 - Discount Calculator

Instructions

Please submit your solution to the following exercise via a Github repository. Your submission must, at a minimum, include a README file with your name, short description of the assignment, and any third party material properly attributed.

Create an app with two views. The first initial view will allow the user to enter in a dollar amount, discount rate, additional discount rate, and sales tax to calculate and visualize the cost of an item. A second view will show the user a graphical breakdown of the costs. The user with a swipe gesture can move from one view to another.
